- CT01: Validar mensagem de erro ao digitar senha incorreta

The screenshot shows the login page of the Cemig portal. At the top, there is a green header with the "CEMIG ATENDE" logo. Below the header, a yellow error message bar displays the text: "Não foi possível efetuar a solicitação, usuário com login ou senha inválidos." (It was not possible to perform the request, user with login or password invalid). Below the error message, the login form is centered. It includes social login options for Facebook, Google, and Apple. Below these, there are input fields for "Usuário" (Username) and "Senha" (Password), with a "ou faça login" (or login) link between them. A link for "Esqueceu sua senha?" (Forgot your password?) is located below the password field. At the bottom of the form, there is a checkbox for "Não sou um robô" (I am not a robot) and a reCAPTCHA widget. A green "Entrar" (Login) button is positioned at the bottom right of the form. The browser's address bar shows the URL "atende.cemig.com.br/Login/Index".
